AMENDMENTS TO THE CLAIMS

- 1. (Currently Amended) A flame retardant resin composition comprising:
- (A) 100 parts by weight of a resin component (component a) which substantially comprises a high impact polystyrene having a reduced viscosity η_{sp}/c , of 0.2 to 1.5 dl/g, and
- (B) 1 to 50 parts by weight of a phosphorus-containing compound (component b-2) represented by the following formula (I-2-a):

$$\begin{array}{c|c} & \text{CH}_2-\text{C} \\ & \text{CH}_2-\text{P} \\ & \text{CH}_2-\text{O} \end{array} \begin{array}{c} \text{CH}_2-\text{O} \\ \text{P}-\text{CH}_2 \\ \end{array} \begin{array}{c} \text{CH}_2-\text{A} \end{array}$$

wherein the resin composition can achieve retention of a heat distortion temperature under load (M) represented by the following expression of at least 95%[[.]]

$$M (\%) = (y/x) \times 100$$

wherein x represents a heat distortion temperature under load (°C) of an article molded from the resin component (component a) and y represents a heat distortion temperature under load (°C) of an article molded from a resin composition comprising the resin component (component a) and the phosphorus-containing compound (component b-2), said heat distortion temperature under load measured by a method according to ASTM-D648 by use of a ½-inch test piece under a load of 1.81 MPa (18.5 Kgf/cm²), and

the resin composition can achieve at least a flame retardancy level V-2 in a UL 94 Standard.

2. (Canceled)

3. (Currently Amended) The resin composition of claim 1, which further contains at least one compound (component c) selected from the group consisting of the following compounds (c-1) to (c-5) in an amount of 1 to 100 parts by weight based on 100 parts by weight of the phosphorus-containing compound (component b-2) represented by the general formula (I-2-a)[[.]].

(c-1) red phosphorus

(c-2) triaryl phosphate represented by the following formula (c-2)

$$R^{1}$$
— O — P — O — R^{3} (c-2)

(c-3) condensed phosphate represented by the following formula (c-3)

$$R^{1} - O - P - O - Ar^{1} - O - P - O - R^{4}$$

$$C - 3$$

$$R^{2}$$

$$R^{3}$$

$$R$$

(c-4) condensed phosphate represented by the following formula (c-4)

$$R^{1} - O - P - O - Ar^{1} - X - Ar^{2} - O - P - O - R^{4}$$

$$C - 4)$$

$$R^{2} - O - R^{4}$$

$$R^{3} - R^{4}$$

$$R^{3} - R^{4}$$

(c-5) compound represented by the following formula (c-5)

wherein in the formulae (c-2) to (c-4), R¹ to R⁴ may be the same or different and represent an aryl group having 6 to 15 carbon atoms which may be substituted by one to five groups selected from an alkyl group having 1 to 12 carbon atoms, an alkoxy group having 1 to 12 carbon atoms, an alkylthio group having 1 to 12 carbon atoms and a group -Y-Ar³ (wherein Y represents -O-, -S- or an alkylene group having 1 to 8 carbon atoms, and Ar³ represents an aryl group having 6 to 15 carbon atoms), Ar¹ and Ar², if both are

present, may be the same or different and represent an arylene group having 6 to 15 carbon atoms which may be substituted by one to four groups selected from an alkyl group having 1 to 4 carbon atoms, an aralkyl group having 7 to 20 carbon atoms and a group –Z-R⁵ (wherein Z represents –O- or –S-, and R⁵ represents an alkyl group having 1 to 4 carbon atoms or an aryl group having 6 to 15 carbon atoms), X represents a single bond, -O-, -CO-, -S-, -SO₂- or an alkylene group having 1 to 3 carbon atoms, and m represents an integer of 1 to 5; and two benzene rings in the formula (c-5) each may have one to four substituents selected from the same substituents as those for the aryl groups represented by R¹ to R⁴.

4. (Original) The resin composition of claim 1, which further contains dicumyl in an amount of 0.01 to 3 parts by weight based on 100 parts by weight of the resin component (component a).

5. (Currently Amended) A flame retardant resin composition comprising:

- (A) 100 parts by weight of a resin component (component a) which substantially comprises a high impact polystyrene having a reduced viscosity η_{sp}/c , of 0.2 to 1.5 dl/g,
- (B) 1 to 50 parts by weight of a phosphorus-containing compound (component b-2) represented by the following formula (I-2-a):

$$\begin{array}{c|c} & O & O - CH_2 & CH_2 - O & O \\ \hline & O - CH_2 & CH_2 - O & P - CH_2 \end{array}$$

$$\begin{array}{c|c} & CH_2 - O & O & O \\ \hline & P - CH_2 & CH_2 - O & O \\ \hline & O - CH_2 & CH_2 - O & O \\ \hline \end{array}$$

$$(I-2-a)$$

and

- (c) 1 to 100 parts by weight based on 100 parts by weight of the phosphorus-containing compound (component b-2) of at least one compound (component c) selected from the group consisting of the following compounds (c-1) to (c-5):
 - (c-1) red phosphorus
 - (c-2) triaryl phosphate represented by the following formula (c-2)

(c-3) condensed phosphate represented by the following formula (c-3)

$$R^{1} - O - P - O - Ar^{1} - O - P - O - R^{4}$$

$$O - P - O - R^{4}$$

$$O - R^{2}$$

$$O - R^{4}$$

$$O - R^{$$

(c-4) condensed phosphate represented by the following formula (c-4)

$$R^{1} - O - P - O - Ar^{1} - X - Ar^{2} - O - P - O - R^{4}$$

$$\begin{pmatrix} C - 4 \end{pmatrix}$$

$$\begin{pmatrix} C - 4 \end{pmatrix}$$

$$\begin{pmatrix} C - 4 \end{pmatrix}$$

(c-5) compound represented by the following formula (c-5)

wherein in the formulae (c-2) to (c-4), R¹ to R⁴ may be the same or different and represent an aryl group having 6 to 15 carbon atoms which may be substituted by one to five groups selected from an alkyl group having 1 to 12 carbon atoms, an alkoxy group having 1 to 12 carbon atoms, an alkylthio group having 1 to 12 carbon atoms and a group -Y-Ar³ (wherein Y represents -O-, -S- or an alkylene group having 1 to 8 carbon atoms, and Ar³ represents an aryl group having 6 to 15 carbon atoms), Ar¹ and Ar², if both are present, may be the same or different and represent an arylene group having 6 to 15 carbon atoms which may be substituted by one to four groups selected from an alkyl group having 1 to 4 carbon atoms, an aralkyl group having 7 to 20 carbon atoms and a group -Z-R⁵ (wherein Z represents -O- or -S-, and R⁵ represents an alkyl group having 1

to 4 carbon atoms or an aryl group having 6 to 15 carbon atoms), X represents a single bond, -O-, -CO-, -S-, -SO₂- or an alkylene group having 1 to 3 carbon atoms, and m represents an integer of 1 to 5; and two benzene rings in the formula (c-5) each may have one to four substituents selected from the same substituents as those for the aryl groups represented by R¹ to R⁴.

6. (Currently Amended) A flame retardant resin composition comprising:

- (A) 100 parts by weight of a resin component (component a) which substantially comprises a high impact polystyrene having a reduced viscosity η_{sp}/c , of 0.2 to 1.5 dl/g,
- (B) 1 to 50 parts by weight of a phosphorus-containing compound (component b-2) represented by the following formula (I-2-a):

$$CH_2 - P$$
 $CH_2 - P$
 $CH_2 - O$
 $CH_2 - O$

- (c) 1 to 100 parts by weight based on 100 parts by weight of the phosphorus-containing compound (component b-2) of at least one compound (component c) selected from the group consisting of the following compounds (c-1) to (c-5):
 - (c-1) red phosphorus
 - (c-2) triaryl phosphate represented by the following formula (c-2)

$$R^{1}$$
— O — P — O — R^{3} (c-2)

(c-3) condensed phosphate represented by the following formula (c-3)

$$R^{1} - O - P - O - Ar^{1} - O - P - O - R^{4}$$

$$C - 3$$

$$R^{2}$$

$$R^{2}$$

$$R^{3}$$

$$R$$

$$(c - 3)$$

(c-4) condensed phosphate represented by the following formula (c-4)

$$R^{1} - O - P - O - Ar^{1} - X - Ar^{2} - O - P - O - R^{4}$$

$$C - 4$$

$$R^{2} - O - R^{4}$$

$$C - 4$$

(c-5) compound represented by the following formula (c-5)

wherein in the formulae (c-2) to (c-4), R¹ to R⁴ may be the same or different and represent an aryl group having 6 to 15 carbon atoms which may be substituted by one to five groups selected from an alkyl group having 1 to 12 carbon atoms, an alkoxy group having 1 to 12 carbon atoms, an alkylthio group having 1 to 12 carbon atoms and a group -Y-Ar³ (wherein Y represents -O-, -S- or an alkylene group having 1 to 8 carbon atoms, and Ar³ represents an aryl group having 6 to 15 carbon atoms), Ar¹ and Ar², if both are present, may be the same or different and represent an arylene group having 6 to 15 carbon atoms which may be substituted by one to four groups selected from an alkyl group having 1 to 4 carbon atoms, an aralkyl group having 7 to 20 carbon atoms and a group -Z-R⁵ (wherein Z represents -O- or -S-, and R⁵ represents an alkyl group having 1 to 4 carbon atoms or an aryl group having 6 to 15 carbon atoms), X represents a single bond, -O-, -CO-, -S-, -SO₂- or an alkylene group having 1 to 3 carbon atoms, and m represents an integer of 1 to 5; and two benzene rings in the formula (c-5) each may have one to four substituents selected from the same substituents as those for the aryl groups represented by R¹ to R⁴, and

(D) 0.01 to 3 parts by weight based on 100 parts by weight of the resin component (component a) of dicumyl (component d).
